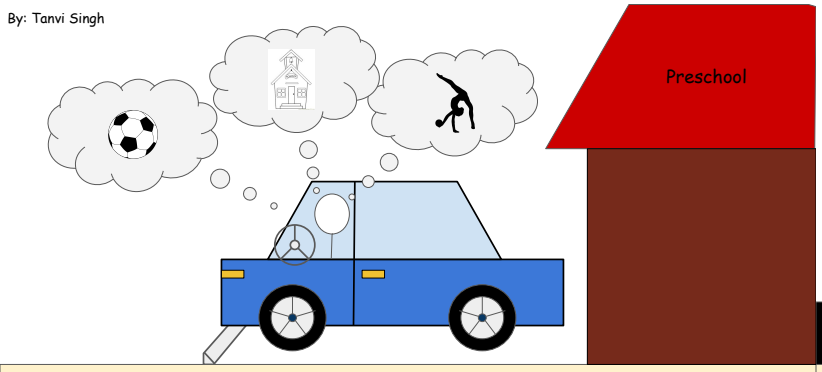
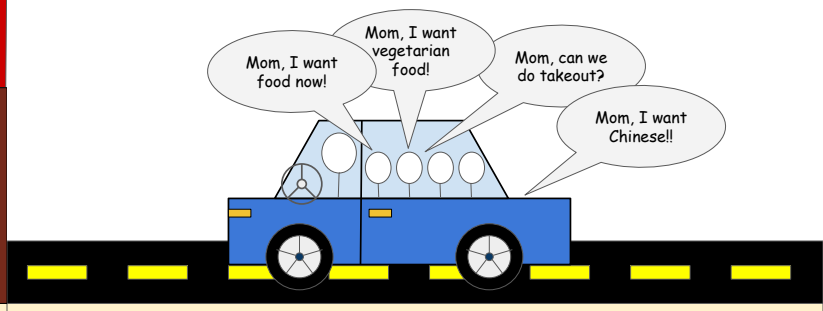
By: Tanvi Singh



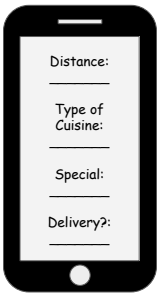
After a long day of work, Nina is exhausted. But, she has to go pick up her kids from all over the place!

By: Tanvi Singh



After Nina has picked up all her children, it's time for dinner! Uh oh, every kid wants something different. How is Nina supposed to accommodate everyone?

By: Tanvi Singh

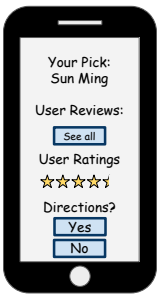


Finally, Nina realises she has Custo! She can take everything her kids want and put it into the app.

By: Tanvi Singh

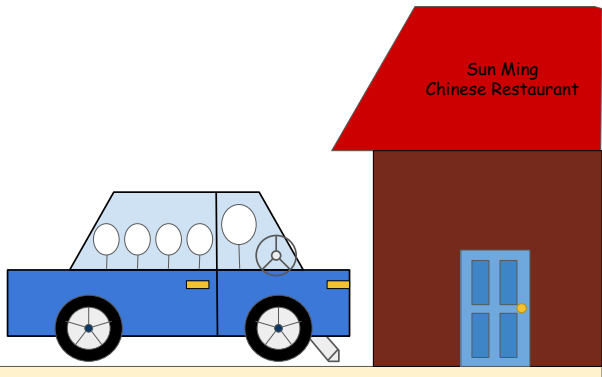
Once she puts in her special customisations, the app generates restaurants that satisfy all her needs.

By: Tanvi Singh



Nina's made her decision! After she picks a restaurant, the app tells her user ratings, reviews and asks if she wants directions.

By: Tanvi Singh



Thanks to Custo, finding the right place to eat is easy as pie! All of Nina's kids are happy and so is Nina.

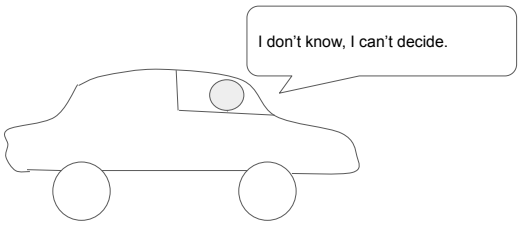
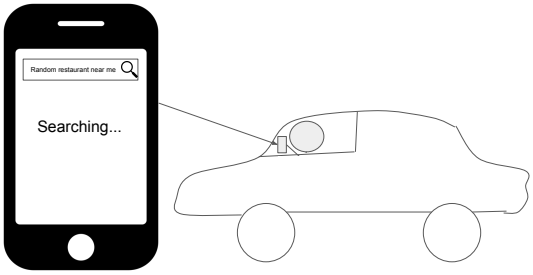
Thomas gets off from work and for once doesn't have any school work to be done. He decides he's going to go out to get something to eat. So, he texts his friend, Ronnie, and asks him if he's hungry. His friend says yes and he goes to pick him up.

By: Brady Smoak



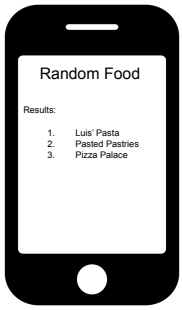
When his friend gets in the car Thomas asks him what he wants to eat, but Ronnie says it doesn't matter to him. Thomas tells him he doesn't really know what he wants and can't make a decision.

By: Brady Smoak



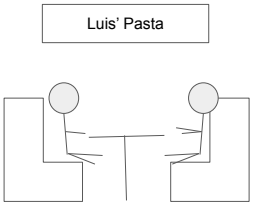
They keep driving by different restaurants but none seem to appeal either of them. After about 15 minutes of just driving, he gets a little frustrated. Thomas decides to google "Random restaurant near me" in hopes to get an idea.

By: Brady Smoak



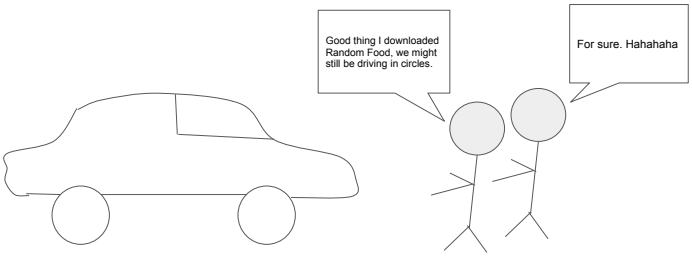
He scrolls a bit, and he sees an app pop up called "Random Food: For when you can't decide," and he downloads it. They both enter all of the information that is asked, like their favorite food types, location, etc. He searches and the top recommendations are listed for him.

By: Brady Smoak



The top one listed is a local restaurant he or his friend have never been too, so they decide to go try it. They go inside, sit down, and wait for their food.

By: Brady Smoak



They both finish their meals, eating every bite. Thomas and Ronnie leave the restaurant with a smile on their face. Thomas says, "Good thing I downloaded Random Food. We might have still be driving in circles." They both get in the car laughing.

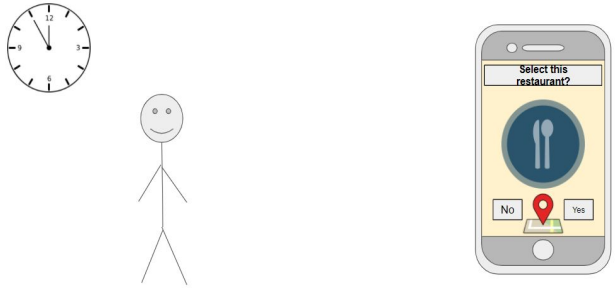
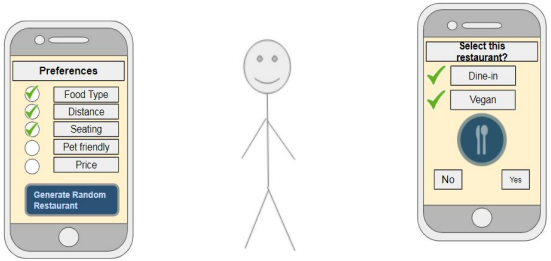
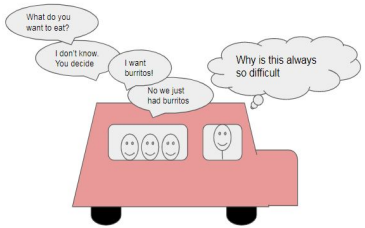
Olivia teaches yoga while the kids are at school



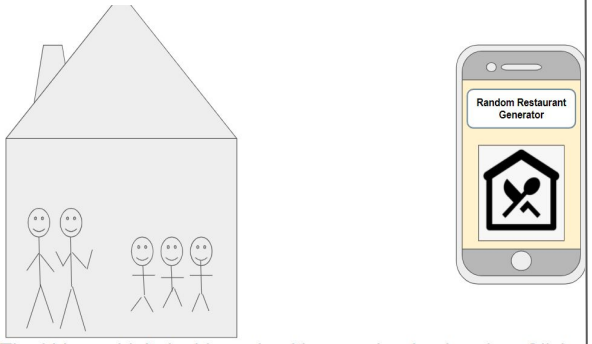
Olivia heard about a new app that can chose restaurants for you.
She doesn't have much time for lunch so she lets it randomly select one close by.



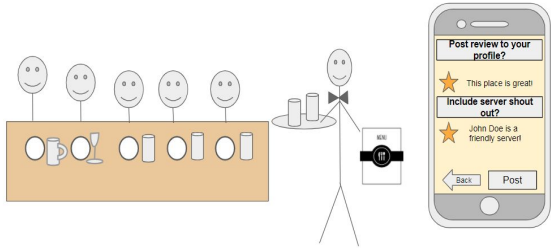
Olivia sets the preferences to vegan, dine-in, and the app randomly selects a restaurant for them.



Olivia picks up the kids from school and asks what they want for dinner.



The kids couldn't decide and neither can her husband so Olivia decides to use the app again



Olivia and her family have a great experience at a new restaurant and decide to leave a review on the app

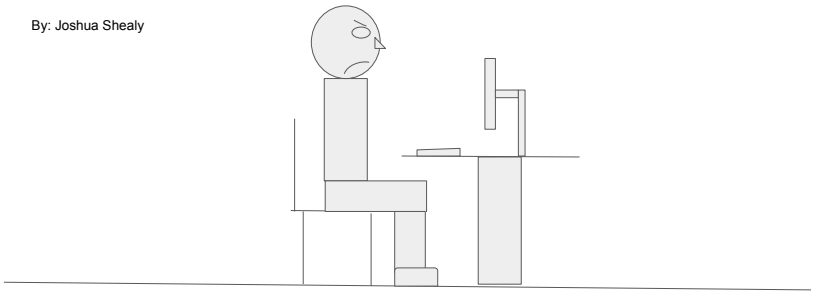
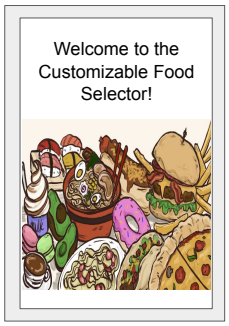
Chad is hard at work finishing a project that is due soon.

By: Joshua Shealy



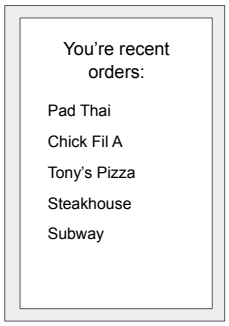
Suddenly, Chad becomes very hungry and cannot focus on his work. It's crunch time and he needs food fast!

By: Joshua Shealy



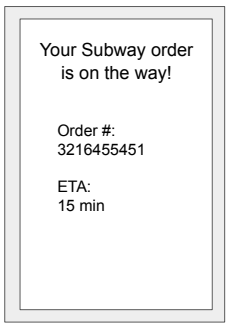
Chad opens up the Customizable Food Selector App.

By: Joshua Shealy



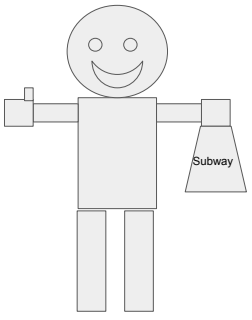
Luckily for Chad, the app has stored the restaurants that he frequents and offers the quickest deliveries

By: Joshua Shealy



Chad was able to select a meal that he wanted and have it delivered to his office.

By: Joshua Shealy



Chad got his food quickly and was able to get back to work.
